**Efficient
& Beautiful**

New England Shade Company

New England Shade Company

Custom shades to meet New England's unique needs for energy-efficient window coverings.

Stay warm beautifully.

Windows typically make up 20% of a house's exterior. Here in New England, with so many older homes with their leaky windows and outdated construction, your heat may be literally flying out the window.

Have a newer home? Your window area is probably more like 40%. Even with tight-fitting windows, weather stripping, and caulking, winter heat loss through your windows can account for *10% to 30% of your heating bill*. Ouch!

We custom-make shades for you that prevent heat loss in three ways:

- Insulation using the Warm Window insulated shade system.
- A moisture barrier to prevent condensation.
- A magnetic seal around the edges to prevent leakage.

Stay cool in summer, too!

Heat always travels in the direction of cold. So, just as New England Shade Company shades keep your heat *in* during winter, they keep it *out* in summer. It's like sunscreen for your house!

Save money on your energy bills.

The savings on your heating and cooling bills could quickly pay for your New England Shade Company shades! In the meantime, you enjoy their beauty and comfort.

Our shades can increase the R-value of your windows by *up to 6 times!* *

[set off in box] What is R-value? R-value is the measure of a material's resistance to heat flow. Heat naturally flows *out* in winter, *in* during summer. **New England Shade Company shades keep the heat *in* during winter, *out* in summer!**

Add beauty to your home.

You choose the type of shade that meets your needs:

- Roman—draw up in graceful accordion-like folds. Inside or outside mount.
- Side-draw—roll on a custom track. Most popular for big picture windows and patio doors.

We custom-make your shades just for you, so they fit *any* window, no matter how large or small.

Coming soon: insulated shutters. We welcome your suggestions!

* compared to old-fashioned single-glazed windows

You choose a fabric to match your décor.

Almost any kind of fabric is suitable for New England Shade Company shades. The Warm Window insulating fabric is on the inside, doing its job invisibly. Buy extra fabric to make matching pillows, valances, and other accessories!

Enjoy these additional benefits...

- Darken the room for day sleepers.
- Reduce noise from outside.
- Add resale value to your home.
- Make the environmentally conscious choice.

Problem with your New England Shade Company shade? Solved.

If anything goes wrong with your shade, we will pick it up from your home or office...fix it...and return it to you within 24 to 72 hours. *That includes evenings and weekends.* (That's a claim the big-name companies don't make!)

Think you're going to pay extra for all this personalized service? Think again. We guarantee to beat the price of any major competitor. For pricing information and how to measure, see [link].

Call now for your *free* in-home consultation!
